[FRONTEND DEVELOPER]

[React development] | [Web designing]

Ability to be calm under pressure and meet deadlines. I am passionate about solving problems for the company and making nice interfaces to inspire Africans to choose a better way to do business. Proven ability to increase efficiency. I worked well with a group of developers to build an NFT marketplace, thus I have a strong passion for working with Crypto, Defi, blockchain technology. As an expert in what I do, I have worked well with a couple of technologies and have used them to build relevant web apps.

WORK EXPERIENCE

Altdeck

October 2021 – January 2022

Frontend Developer

Built NFT marketplace where highly valuable assets can be traded.

- Converted Figma design to web app using Nextjs .
- Learnt basis of Rust for better backend development.
- Integrated the backend with the frontend.

Freelancing

UI/UX designer

Designed a nice website UI for a chocolate company.
